

Yamaha FJR1300 Rear Hugger

It is best practise to clean the swingarm first before fitting to ensure a good fit

1. Remove protective film from brackets and Hugger.
2. Fit large “bent” bracket to left hand spool bolt as shown in Picture 1.
 - Do not fully tighten.
3. Undo right hand side bolt and fix bracket as seen in Picture 2.
 - Do not fully tighten.
4. Fit all square snap nuts to the inside of the brackets.
5. Feed Hugger in from rear of tyre and fit to brackets using bolts provided. Make sure brackets are on the inside of the Hugger.
6. Check alignment of Hugger and fully tighten all bolts and bracket mountings.
7. Check all fittings periodically for tightness.
