

D-Series

Modular Packing System

 DRYSPEC

BRAND HISTORY

Founded in 2012

- Frustration with existing bags
- Non-waterproof textile or awkward limp drybags

DESIGN PHILOSOPHY

100% Waterproof = Submersible

- RF welded seams
- No “weatherproof” BS

Inspired by Tactical Military Gear

- Modular by design, means you can do more with less
- Removable, Interchangeable, Replaceable components allows users to add, adapt, & customize

Quick & Easy Access

- Low-Profile Roll-Top Closure
- Access contents without un-strapping

Quick & Easy Mounting

- Slip-Lock mounting, straps included
- Rigid Core, Able to mount when empty

WATER PROOF **DRYSPEC**

WATER PROOF **DRYSPEC**

MODULAR DESIGN

D-SERIES DRY BAG LINE

Do More with Less

- Each bag is designed to be used alone or as part of a larger packing system
- One system, Three Bags, Infinite Possibilities

Seperate Wet from Dry, Clean from Dirty

- Dont pack all your gear in one huge bag of the same volume
- Keep your wet tent in one, and your dry clothes in another

Get Creative, Build your own system

- Welded daisy chain creates a 12 point attachment system
- Create, Adapt, & Customize

“One System, Three Bags Infinite Possibilities”

D38

D78

D106

 **MADE IN U.S.A.**

D38

Rigid Core Dry Bag

The D38 features a rigid core that enables the bag to be mounted to any bike, with or without a top rack, even when the bag is completely empty. Try that with a traditional dry bag! The rigid construction and unique 4-point strap mounting system work together enabling easy access to contents without loosening straps or removing the bag from the bike.

Features:

- Rigid Core Construction
- Modular packing (mates with D20 and D28)
- Universal slip-lock mounting straps (included)
- Mounts with or without toprack
- Infinitely useful daisy chain mounting strip
- Retro Reflective Logo
- Adjustable & detachable carry handle
- Strap keepers to secure access webbing
- Available in Black, Orange, or Gray

Specs:

- 38 Liters
- 100% waterproof (Radio Frequency Welded Seams)
- 22" long x 12" wide x 9" tall
- 22oz Vinyl & coated Cordura

 **DRYSPEC**

MADE IN U.S.A.

D28

Dual-End Dry Bag

Unlike other dry bags, the D28 features a dual-end roll design that allows access to belongings from either end of the bag without having to disconnect the mounting straps. The D28 is perfect by itself for short trips, but is the ideal add on bag for a D38 or set of sidecases.

Features:

- Dual-Ended opening
- Modular packing (mates with D20 and D38)
- Universal quick release mounting straps (included)
- Mounts with or without toprack
- Infinitely useful daisy chain mounting strip
- Retro Reflective Logo
- Strap keepers to secure access webbing
- Welded carry handle
- Available in Black, Orange, or Gray

Specs:

- 28 Liters
- 100% waterproof (Radio Frequency Welded Seams)
- 22" long x 9" wide x 9" tall
- 22oz Vinyl & coated Cordura

 **DRYSPEC**

MADE IN U.S.A.

D20

Dry Saddle Bag Set

Unlike all other saddlebags, the D20's interchangeable center strap enables the bags to mount directly to a bike with or without sideracks as well as attach directly to other D Series dry bags. Use the Velcro center strap for convenience, the solid nylon strap for extremely muddy conditions, or remove the center strap all together to mount the bags directly to a D28 or D38 dry bag. Mounting the D20 saddlebags to the D28 or D38 dry bag is the ideal solution for riders who want the extra storage but can't mount traditional saddlebags due to high exhausts.

Features:

- Modular packing (mates with D28 and D38)
- Universal slip-lock mounting straps (included)
- Interchangeable center straps (Velcro or solid nylon)
- Mounts with or without sideracks
- Retro Reflective Logo
- Available in Black, Orange, or Gray

Specs:

- 40 liters (20 liters each side)
- 100% waterproof (Radio Frequency Welded Seams)
- 17" long x 6" wide x 12" tall
- 22oz Vinyl & coated Cordura

MADE IN U.S.A.

 **DRYSPEC**

Slip-Lock

Universal Mounting System

Incredibly Strong, Surprisingly Fast

- Quickly mount or remove up to 106 liters in seconds
- No top or side racks necessary

Rigid Core Construction

- Only dry bags that can be mounted empty
- Open / Close dry bag without loosening the mounting system

Mounting

Slip-lock mounting straps feature a 3/4" metal slip-lock at the end of each strap that is designed to mate with the 1" plastic loops on the bags. Dryspec invented slip-lock straps to create the most durable and most low-profile attachment system available. Slip-lock straps are included with the D20, D38, and all D-Series modular combinations.

Step One: Identify the mounting points you plan to use for each of the four straps. Any closed part of the bike will work (like the frame or rear footpeg bracket).

Step Two: Wrap the loop-end around the mounting point then pass the slip-lock end through the loop. Pull the slip-lock end up towards the bag to secure the strap around the bike. Repeat this step for all four straps.

Step Three: Note: In many situations, the dual ended slip-lock strap is easier to use in place of the regular slip-lock straps on the rear. It creates a closed loop that can be passed under a license plate bracket or tail light assembly.

Step Four: With the slip-lock flat to the strap, pass the slip-lock completely through the under side of the plastic loop on the bag. Repeat this for all four straps.

Step Five: Once the slip-lock passes through the plastic loop, notice that it will not pass back through the loop without holding the slip lock flat to the strap with your other hand.

Step Six: Once all four slip-lock straps are attached to the bag pull the end of the strap downward to tighten the bag to the bike. Tuck the remaining strap ends under the plastic strap keepers to keep them from blowing and tangling in the wind.

D56

Side Case Expansion Set

The D56 includes two D28 dry bags creating the perfect addition to sidecase and panniers. Or, stack the bags to create a modular, rear bray bag with super convenient access to your gear inside.

Features:

- Access contents with out un-strapping the bags
- Mounts horizontal or vertical
- Quick Release Strap Set (included)
- Welded carry away handle

Specs:

- 56 liters (28 liters eac)
- 100% waterproof (Radio Frequency Welded Seams)
- 22" long x 9" wide x 9" tall (each)
- 22oz Vinyl & coated Cordura

 **DRYSPEC**

MADE IN U.S.A.

D66

2 Piece Modular Dry Bag Packing System

The D66 includes one D28 and one D38 dry bag. The two-bag D66 system makes packing and organizing your gear easier, allows for quicker access to your gear, and enables strategic separation of your gear. Each D-Series bag is also designed to mount directly to your bike, so you truly get three different bags in one. Use the D28 on local trails, strap on the D38 for around town, or connect the D66 for your longer adventures.

Features:

- Includes a complete D28 & D38 dry bag
- Universal slip-lock mounting straps (included)
- Universal quick release mounting straps (included)
- Mounts with or without toprack
- Infinitely useful daisy chain mounting strip
- Retro Reflective Logo
- Strap keepers to secure access webbing
- Available in Black, Orange, or Gray

Specs:

- 66 Liters
- 100% waterproof (Radio Frequency Welded Seams)
- 22" long x 12" wide x 18" tall
- 22oz Vinyl & coated Cordura

D68

Rear Bag / Saddle Bag Hybrid

The D68 includes one D20 Saddle bag set and one D28.

The D68 is ideally suited for riders on [smaller enduro bikes](#) who need big storage capacity but don't want to be weighed down with bulky sideracks just to keep the bags off your exhaust.

Features:

- Three packing solutions in one
- Access contents with out un-strapping the bags
- Keeps Saddle Bags up and out of the way of your exhaust

 **DRYSPEC**

MADE IN U.S.A.

D78

Rear Bag / Saddle Bag Hybrid

The D78 is ideally suited for riders on [larger bikes](#) who need big storage capacity but don't want to be weighed down with bulky sideracks just to keep the bags off your exhaust.

Features:

- Three packing solutions in one
- Rigid D38 will support the D20 saddlebags even when completely empty
- Keeps Saddle Bags up and out of the way of your exhaust

 **DRYSPEC**

MADE IN U.S.A.

D106

3 Piece Modular Dry Bag Packing System

The D106 packs 106 liters of storage without the need for a top rack or side racks. Use all the bags together or each individually. You truly get 4 different packing solutions in one.

Features:

- Four packing solutions in one
- Rigid D38 will support the D20 saddlebags even when completely empty
- Keeps Saddle Bags up and out of the way of your exhaust

 **DRYSPEC**

MADE IN U.S.A.

Utilitarian Styling

Universal Design

- Looks good and fits well on all bikes
- Available in Black, Grey, & Orange

DIY System

Create, Adapt, Customize

- Removable, interchangeable, & replaceable straps allow users to create, adapt, & customize
- 12 Point welded daisy chain allows infinite mounting and accessory attachment possibilities

DRYSPEC

MADE IN U.S.A.

B50 & B65

Wide Mouth Dry Bag

The B50 & B65 feature a wide opening and an adjustable / removable handle attached to D-rings. These D-rings serve double duty, acting as the fixing points to secure a wide variety of strap styles up and over the bag. The B50 is the ideal bag for riders who want the most volume at the best price point.

Features:

- Wide mouth opening
- Mounts with or without toprack
- 4 oversized D-Ring accept wide variety of mounting strap styles
- Compatible with DrySpec Cam Strap Set
- Adjustable & detachable carry handle
- Retro Reflective Logo
- Available in Black

Specs:

- 50 or 65 Liter Sizes
- 100% waterproof (Radio Frequency Welded Seams)
- 22" (or 28") long x 12" wide x 12" tall
- 22oz Vinyl & coated Cordura
